

Chicago, IL, USA | 281-885-9345 | ellismarkf@gmail.com | https://mfellis.com

summary

Forward-thinking Software Engineer with 8 years of experience driving all phases of the software development life cycle, including requirements analysis, design, development, and implementation. Demonstrated history of collaborating effectively with cross-functional teams to deliver projects on time and within budget. Adept at leveraging Agile methodologies and CI/CD practices to optimize development processes. Skilled at tackling complex technical challenges with innovative solutions, leveraging both technical expertise and strategic vision. Committed to driving continuous improvement and delivering high-quality software solutions.

experience

Indeed Sep 2022 → May 2024

Senior Software Engineer (Remote)

- → Helped migrate email-based messaging system to real-time messaging platform, resulting in streamlined workflows across 100+ pilot users
- → Greatly mitigated legal risk by implementing front-end messaging platform features and bug fixes
- → Orchestrated the development and deployment of a critical cross-team backend messaging feature, fixing a broken messaging workflow impacting 25% of all employer users
- → Served as on-call first responder on a rotating basis, resolving production issues, scaling devops infrastructure, and improving application monitoring and alerting

Niantic Feb 2022 → Jul 202

Software Engineer (Remote)

- → **Contributed full stack features** to external and internal Google Cloud Platform web applications using React, Angular, Node.js, Groovy, and Google Spanner DBÅ
- Drove a 90% improvement in API request times by tuning SQL queries, significantly enhancing system performance and overall responsiveness
- → Researched and owned UI development of large scale feature for internal GeoData platform tool
- → Configured automated linting and code formatting for project, helping reduce noise in code reviews.

Animoto Mar 2021 → Mar 2021

Senior Full Stack Engineer (Remote)

- → Collaborated with product and design to build new features for web-based video editing application with React, Typescript, Redux, Node.js, Ruby, and MySQL
- → Implemented custom font upload and validation in a Node.js media processing pipeline
- → Increased conversions by 13% by planning and executing A/B testing for subscription tier pricing

JP Morgan Chase

Aug 2018 → Aug 202

Senior Software Engineer (Houston, TX)

- → UI tech lead on development of internal CRM tools using OpenFin, React, Redux, and Spring Boot
- \rightarrow Promoted coding standards and best practices across web teams, and mentored engineers
- → Increased code coverage to a 90% threshold by building automated testing infrastructure with Selenium for end-to-end testing, and Jest for UI unit testing
- Standardized hiring process for frontend engineers and conducted interviews
- → Reduced delivery lead time from 60 days to 3 days or less by modernizing team's software development lifecycle

Software Engineer II (Houston, TX)

Aug 2017 → Aug 201

- → Increased sales team efficiency by 100+ hours per week by prototyping and delivering application rewrite
- → Coordinated with cross functional teams to plan and prioritize backlog

PROS Nov 2014 → Aug 2016

Software Engineer (Houston, TX)

- ightarrow Worked closely with UX and Product teams to rebuild legacy sales analytics dashboards in React
- → Extracted common UI components into an internally-shared component library
- → Reduced average build time and CPU usage by 87.5% and 93% by optimizing Webpack builds

education

Hack Reactor

Full Stack Engineering Bootcamp (Austin, TX)

- ightarrow 12-week immersive software development program that teaches full-stack Javascript development
- → Stayed on as a teacher's aide for two months after graduating

University of Houston

Bachelor of Arts, English (Houston, TX)

skills

typescript, javascript, html5, css3, react, redux, webpack, unit testing (jest, junit), end-to-end testing (cypress, cucumber), CI/CD (jenkins, gitlab), cloud services (AWS, GCP), Node.js (express.js), java, kotlin (spring), git, ruby (rails), postgres, mysql, datadog, terraform, graphql (apollo)
